

Abstract Submitted
for the PSF15 Meeting of
The American Physical Society

“OXYFUSION & Protein-Polymer Assemblies”¹ WIDASTRA HIDAJATULLAH-MAKSOED, Prodi of Physics UI, Depok 16424- INDONESIA — Under courtesies of “protein-polymer assemblies” from P Tanner,2011 are from Hao Zeng, :”**Exchange-coupled Nanocomposite Magnets . . .**”:“both FePt & Fe₃O₄ particles are incorporated in nanometer-scale building blocks into binary-assemblies”, 2002 in considers R. Savic 2003:”block copolymer micelles ..” and G Richard Newkome – intends to relates “dengan Kerajaan itu maka sucilah. . .” notions – statements:”Mathematics & Arts converge in the fractal forms that also abound in Nature..”, “**Nanoassembly of Fractal Polymer. . .**”, 2006 thought “are protein-polymer assemblies fractal building block copolymer..?”. Instead in Eduardo Ruiz-Hitzky: “**Introduction to Bio-nanohybrid Materials:**” a fractal character showed in gelatin-based bio-nanocomposites”, Fig 1.7 – for “allowing the biopolymer to skip & diffuse during dewetting, forming the final branched fractal structure..” in AF Lubambo:”**Dewetting Patterns & Stability of thin Xyloglucan . . .**” then retrieved the OXYFUSION by “KOMPAS” Liabile Officers whereas to Indian Ocean Rim Initiatives we can adopts INDONESIA Incorporates. . .

¹acknowledgments to HE. Mr. Drs. P. SWANTORO/HE. Mr. Dr. Norbertus NURANTO
