Abstract for an Invited Paper  
for the SES05 Meeting of  
the American Physical Society

**Recent results from CDF and D0**

YURI GERSHTEIN, Florida State

I will present recent results from the CDF and D0 experiments at Tevatron. More than inverted femtobarn of data has been delivered to both experiments, and even more is underway. I'll discuss new precision measurements of the SM parameters and searches for phenomena beyond the SM.
