Abstract for an Invited Paper
for the SES08 Meeting of
the American Physical Society

The Skynet Robotic Telescope Network

DANEIL REICHART, University of North Carolina

Over its first three years of operation, the Skynet Robotic Telescope Network has taken over 1 million images for approximately 20,000 users. To date the network consists of telescopes in Chile, North Carolina, Italy, Colorado, and California. I will describe Skynet and demo one of its telescopes.
