Abstract for an Invited Paper  
for the SES15 Meeting of  
the American Physical Society

**The Dark Side of the Universe**

ROCKY KOLB, University of Chicago

Ninety-five percent of the Universe is a mystery! Astronomical observations suggest that most of the universe is dark. The stuff out of which we are made, the visible world we see around us, seems to comprise only 5% matter holds our galaxy together and a mysterious dark energy pushes the galaxies apart. The dark side of the Universe is the frontier of 21st century cosmology.
