

Abstract Submitted
for the SES16 Meeting of
The American Physical Society

Scenario Theory (Simulated Reality Evidence) AHMAD REZA ESTAKHR¹, Physics Researcher — Scenario theory is about a series of suspicious astrophysical events that (it seems) projected to occur by an unknown Scenarist. for example, All stars release Big Bang's energy which is stored at Hydrogen atom, It is really suspicious Astrophysicsl process, Why Hydrogen atom is so stable? It is proposed that our universe is simulated to follow the scenario and there are things that even its scenarist is unaware of them, and it is the mean reason why scenarist simulated our world.

¹It is my second abstract to this meeting, that one was oral, and this one is poster.

Ahmad Reza Estakhr
Physics Researcher
