

Abstract Submitted  
for the TS4CF08 Meeting of  
The American Physical Society

**Future Faces of Physics** TONI SAUNCY, Angelo State University —  
In keeping with its commitment to help students transform themselves into contributing members of the professional physics community, the Society of Physics Students National Council began efforts aimed at addressing issues of diversity in physics several years ago. One of the projects stemming from these discussions is the adoption of a 2008 theme “The Future Faces of Physics.” With this theme, the council aims to raise visibility and focus on issues of student diversity in physics. The initiative included the distribution of “Future Faces of Physics Kits” to any chapter hosting zone meetings. A highlight of the kit is the Future Faces of Physics Jeopardy set, which consists of buzzers, a score board, instructions, and a game board. The Future Faces of Physics game is a vehicle for generating discussion and raising awareness. The diversity session is hosted by the SPS Zone 13 and Zone 16 leadership.
