

Abstract Submitted  
for the TSF15 Meeting of  
The American Physical Society

**TS AAPT Workshop 5 – Planck’s Constant** REGINA BARRERA,  
TOM O’KUMA, Lee College, STEPHANIE INGLE, Kingwood High School — This  
workshop is going to use low cost items [to view the spectra of gasses (the happy  
ones that is) and to view an ejecting photon device (LED)] to determine a very tiny  
constant that is usually symbolized by “ $h$ ”, sometimes known as Planck’s constant.  
Participants will make a class set of the device (8 sets) to take home for their  
classes. We will be utilizing other tools that you or your students may have to show  
alternative ways to determine this constant.
