

Abstract Submitted  
for the TSF17 Meeting of  
The American Physical Society

**Contributions to the ProtoDUNE Field Cage construction process** DANIEL KOSS, Univ of Texas, Arlington, PROTODUNE TEAM — In the building of the ProtoDUNE Field Cage, teamwork and ingenuity are required in all facets of the construction process. Everyone must do their best to bring both physical and mental contributions to the project, while operating in an efficient manner in both regards. As a team leader in the preparation and inspection of the Field Cage components, and the coordinator of the shipping of these parts, my job is to keep work flow moving towards a swift but complete goal. The ProtoDUNE Field Cage is a test of time and team management skills that will assist coordination of other projects in the future.
