

Abstract Submitted
for the TSF19 Meeting of
The American Physical Society

Things Are A Changing! KAREN JO MATSLER¹, UT Arlington and PTRA — Educators are fortunate to have so many resources at their disposal, yet it is also a formidable task to stay abreast of research and discoveries AND figure out how to expose our students to new concepts like gravitational waves and M87. PTRA is providing opportunities for educators to expand their own content and classroom experiences for students. This talk will identify ways you can join us in providing support for K-16 educators.
