

Abstract Submitted
for the TSS08 Meeting of
The American Physical Society

Radiation and Health ALBERT E. EVANS, Chairman, STW Committee, South Texas Chapter of the Health Physics Society — This is a shortened version of the Science Teachers' Workshop offered free of charge to primary and secondary teachers at a location of their choice, covering fundamentals of nuclear radiation, natural and man-made sources of radiation, biological effects and risks to health, radioactive waste management, and radiation safety management and regulation. The course includes a hands-on demonstration of use of Geiger Counters, which are given without cost to participants for use in their classes. A CD and notebook of class material are issued to each student. Lunch will be provided. Limited to 20 participants.
