

Abstract Submitted  
for the TSS15 Meeting of  
The American Physical Society

**NY Times Arts Section Applications Used to Help Teach Physics**

JOHN CISE, Austin Community College — Since 2007 I have been using New York Times articles with physics applications as a way to help teach physics. The New York Times has many sections (Sports, Automotive, Arts, etc.) with articles containing physics applications. Articles & related graphics are placed in WORD then edited to fit on one page. More graphics are added. Also added are: Introduction, questions, hints, and answers to questions. The one page WORD document is saved as a pdf file and uploaded to the NYTimes Apps site: <http://CisePhysics.homestead.com/files/NYT.htm> The application pages specific to this abstract paper on “New York Times Arts Section Applications Used To Help Teach Physics” are: <http://CisePhysics.homestead.com/files/NYTArtsPhysicsApps.pdf> The author uses the NYTimes Applications for: Introduction to new concepts, quizzes, extra credit, test questions. Students and author enjoy using these current news physics applications.
