The American Physical Society

Future Faces of Physics at Texas Lutheran University: The SYS-S.T.E.M. Program¹ MAEGAN IDROGO, VANESSA ESPINOZA, EDWARD SCOTT, TONI SAUNCY, Texas Lutheran University — The Texas Lutheran University chapter of the Society of Physics Students (TLU SPS) has recently increased outreach efforts by partnering with a local after school program, Seguin Youth Services. The program, “SYS-S.T.E.M.” is funded by the Future Faces of Physics award program, administered by the SPS national office. TLU SPS was the recipient of a SPS Future Faces of Physics award to carry out a series of mentoring sessions in which TLU undergraduate physics students work with small groups of elementary school students to conduct hands-on physics labs. We will report on the Future Faces of Physics program on how our efforts are unfolding.

¹This project is funded by the Society of Physics Students National Organization
