Workshop: Engaging Ways to Introduce Quantum Concepts

KAREN JO MATSLER, University of Texas Arlington, JANIE FOSTER, Foster High School — Quantum is a little intimidating because we don't understand it all, but to students it is an exciting "frontier". They are eager to learn about black holes, dark matter, and all the other challenges that scientists are trying to understand. Why not capture that excitement and help them understand a little quantum? This workshop will give you resources and confidence to begin the journey to the unknown.
