

Abstract Submitted
for the TSS17 Meeting of
The American Physical Society

Lessons from the IPLWCs¹ THOMAS O’KUMA, Lee College — The IPLWCs (Introductory Physics Laboratory Writing Conferences) were part of the ATE Workshops for Physics Faculty Project that operated from 2010 to 2016. These nine 3-day conferences were to develop “new” laboratory activities for high school and college/university introductory physics courses. Some of the IPLWCs had a theme or target topical area. In this talk, I will describe the IPLWCs, discuss some of the “products” from them, and finally some of the lessons we learned in doing them.
