AAPT Workshop W6: Electricity with all of the Circuits and Half of the Stress TRINA CANNON, Eastfield College UNT-Dallas — Electricity can be an en-lighten-ing experience. But have to de-bug circuits and replace light bulbs or exhausted batteries can make the lessons tedious beyond the average Tylenol tablet! I have used the CASTLE materials and developed a fool proof way of working through the fundamentals. There is plenty to do and an easy technique to bring up special examples for your class. This strategy give you plenty of options for expansion.
