

Abstract Submitted
for the TSS21 Meeting of
The American Physical Society

Gains and Losses: The Balance of Pandemic Teaching KENRIC DAVIES¹, Liberty High School — A year ago, we were all forced into the virtual world and asked to continue providing high quality education to our students. Since then, the terms "asynchronous" and "sanitizer" are in our weekly, if not daily, vocabulary and the school day looks very different from previous years. During this talk, I hope to show the gains that have been made in my personal teaching that balance the losses that I have felt along the way.

¹This is the 7th talk in the special session "Physics Teaching in the Era of the Pandemic"
