

Abstract Submitted
for the TSS21 Meeting of
The American Physical Society

Free Falling Atom JAMES ESPINOSA, DR. JAMES C. ESPINOSA,
Weatherford College — In the mid 1960's, Gryzinski published in the Physical Re-
view Letters the idea that atomic electrons are falling into the nucleus. They are
diverted by magnetic forces from entering it. We will summarize his development of
this purely classical model and present a time line showing the rise and fall in the
interest in this picture of the atom.
