

Abstract Submitted  
for the APR06 Meeting of  
The American Physical Society

**“Hidden Kinetic Energy” and “Mass-Electric” Principle** PHILIP CHU, Avery Dennison — A hypothesis is proposed which suggests another fundamental energy equation of Special Relativity. Another relativistic variance is described which gives self-consistent definition of Lagrange Function for both classical and relativistic dynamics. This hypothesis leads to a new “Hidden Kinetic Energy” concept as well as a new “Mass-Electric” Principle.
