Search for a $J/\psi\omega$ resonance at Babar ARAFAT GABAREEN
MOKHTAR, Colorado State University, BABAR COLLABORATION — A sample
of 384 million $\Upsilon(4S) \rightarrow B\bar{B}$ events collected by the BaBar experiment is analyzed
to search for $B \rightarrow YK$ ($Y \rightarrow J/\psi\omega$) decays. In this talk, I will present the results of
this study as well as a comparison between our results with those obtained at other
experiments.
