The American Physical Society

**General Relativity - The Impossible Theory** RONALD KOTAS,  
Grand Quantum Research — General Relativity envisions a gravitating mass will distort Time and Space about the Sun. This is false because of the millions of degrees of temperature of the very active Sun's Corona, and is plainly a refraction process; not a GR effect. If a gravitating mass were effecting time - space, this curve or geometry would be curved positively with respect to that mass. In an opposite mass this would have an opposite curvature respecting the first mass and would produce repulsion, not attraction. GR does not provide for attraction between two masses. The Mercury precession of the perihelia 43 arc seconds per century, is explained by Newtonian functions. The exact 2/3rds ratio of the day-to-year is profound. The speed of light has been exceeded by demonstrations and mathematical proofs. The principle of equivalence has been violated. No one can explain how or what mechanism within GR causes actions at a distance. Therefore GR is an impossible theory and is not an explanation of Gravity and Gravitation. With 19 proofs and indications, Nuclear Quantum Gravitation provides a coherent, precise explanation of Gravity and Gravitation.
