Abstract for an Invited Paper
for the APR08 Meeting of
the American Physical Society

Scientific Careers in Public Policy

DON ENGEL, Senior Science Policy Fellow, APS Washington Office

Congress is built to respond to the will of its constituents. Representatives and their staffs are awash in information. If scientists do not communicate regularly and effectively with Congress, policies requiring sound scientific underpinnings will be ill-crafted. As a panelist, I will represent scientific careers in public policy, and will also address how civic engagement can be woven into the fabric of any career path.
