Search for the Decay $D^0 \rightarrow \omega\eta$ CAITLIN MALONE, Ohio State University, BABAR COLLABORATION — We present a preliminary result of the search for the decay $D^0 \rightarrow \omega\eta$ where D^0 comes from the decay $D^{*+} \rightarrow D^0\pi^+$. We use a high statistics data sample collected with the BaBar detector at the PEP-II asymmetric e^+e^- collider at SLAC.
