Abstract for an Invited Paper
for the APR09 Meeting of
the American Physical Society

J. J. Sakurai Prize for Theoretical Particle Physics Talk: Partons, QCD, and Factorization¹

DAVISON SOPER, University of Oregon

Many important cross sections in high-energy collisions are analyzed using factorization properties. I review the nature of factorization, how it arose from the parton model, and current issues in its development. This talk will be coordinated with the one by Collins.
