Nuclear Quantum Gravitation, The Explanation of Gravity – Gravitation, With 26 Proofs and Indications RONALD R. KOTAS, Grand Quantum Research — With 26 proofs and indications, Nuclear Quantum Gravitation provides a coherent, precise explanation of Gravity and Gravitation. General Relativity is not an explanation of Gravitation or Gravity. General Relativity has no definitive proofs. GR does not bend light about the Sun; the Sun's corona does because of Newtonian refraction. The Mercury Perihelion is dynamic Newtonian Mechanics, not a proof of GR. The Red Shift is a Quantum Effect. The shift is in the area of the atomic nucleus, plainly a quantum function. Time is not a type of flowing medium and therefore cannot be changed by GR or its' mathematics. Space is not a type of medium or fabric, only a place where matter may exist and radiation may transpose. No one can explain how, or what mechanism within GR causes actions at a distance. Time does not change or dilate; clocks and oscillators do when in a lesser gravitational field. This is not GR. Therefore GR is an impossible theory and is not an explanation of Gravity and Gravitation. It is very apparent that Gravity and Gravitation is based in the atomic nucleus as explained by Nuclear Quantum Gravitation.
