

Abstract Submitted  
for the APR10 Meeting of  
The American Physical Society

**The Nucleon Form Factors measurement at EIC** BOGDAN WOJTSEKHOWSKI, TJNAF — The large luminosity of EIC will provide a unique possibility to study the proton and the neutron at very large momentum transfer where the QCD predictions could be tested. A nucleon Form Factor experiment up to  $50 \text{ GeV}^2$  at EIC will be discussed.
