

Abstract Submitted
for the APR13 Meeting of
The American Physical Society

Prospects for GW transients in early Advanced LIGO and Virgo science runs GABRIELA GONZALEZ, Louisiana State University, LIGO SCIENTIFIC COLLABORATION AND VIRGO COLLABORATION — Advanced LIGO and Advanced Virgo are kilometer-scale gravitational wave detectors that are expected to yield the first direct observations of gravitational waves. I will describe the currently projected schedule, sensitivity, and sky localization accuracy for the GW detector network in the next decade.
