Abstract for an Invited Paper
for the APR13 Meeting of
the American Physical Society

Review of New Particle Searches from ATLAS and CMS

SUNGWON LEE, Texas Tech University

Recent results of searches for physics beyond the Standard Model in proton-proton collisions at the LHC will be reviewed in this talk. Many searches for various new physics phenomena, including supersymmetry, are performed by the ATLAS and CMS experiments in a wide range of physics channels. In many cases these searches set the most stringent limits to date on many new physics models. Future prospects for new physics searches at LHC will also be discussed.
