The Concept of General Relativity is not Related to Reality

RONALD KOTAS, Grand Quantum Research — The concept of general relativity is not related to reality. It is not real or factual Science. GR cannot account for objects falling to earth or for the weight of objects sitting on the earth. The Cavendish demonstration showing the attraction between two masses at right angles to earth's gravity, is not explained by GR. No one can prove the existence of "space fabric." The concept of "space time" effects causing gravitational attraction between masses is wrong. Conservation law of energy - momentum does not exist in GR. LIGO fails in detecting "gravity waves" because there is no "space fabric" to transmit them. The Gravity B Probe data manipulated to show some effects, is not proof of "space fabric." It is Nuclear Quantum Gravitation that provides clear definitive explanation of Gravity and Gravitation. It is harmonious with Newtonian and Quantum Mechanics, and Scientific Logic. Nuclear Quantum Gravitation has 10 clear, Scientific proofs and 21 more good indications. With this theory the Physical Forces are Unified. See: OBSCURANTISM ON EINSTEIN GRAVITATION? <http://www.santilli-foundation.org/inconsistencies-gravitation.php> and Einstein's Theory of Relativity versus Classical Mechanics, by Paul Marmet <http://www.newtonphysics.on.ca/einstein/>
