Abstract for an Invited Paper  
for the APR16 Meeting of  
the American Physical Society

**Revisiting the U(1) Goldstone Boson of Large N QCD**

MICHAEL DINE, University of California, Santa Clara

Recently, questions about large field inflation have rekindled interest in monodromy in field theory and string theory. In this talk, we revisit aspects of the U(1) problem in QCD, embedding the issue in a setting with broken supersymmetry.
