

Abstract Submitted  
for the APR17 Meeting of  
The American Physical Society

**Big Bang of Massenergy and Negative Big Bang of Spacetime**

DAYONG CAO, None — There is a balance between Big Bang of Massenergy and Negative Big Bang of Spacetime in the universe. Also some scientists considered there is an anti-Big Bang who could produce the antimatter. And the paper supposes there is a structure balance between Einstein field equation and negative Einstein field equation, a balance between massenergy structure and spacetime structure, a balance between an energy of nucleus of the stellar matter and a dark energy of nucleus of the dark matter-dark energy, and a balance between the particle and the wave-a balance system between massenergy (particle) and spacetime (wave). It should explain of the problems of the Big Bang. <http://meetings.aps.org/Meeting/APR16/Session/M13.8>
