

Abstract Submitted
for the APR20 Meeting of
The American Physical Society

Mandatory Freshman Year Research ASIM GANGOPADHYAYA,
JONATHAN BOUGIE, Loyola University Chicago — With some trepidation, my
colleagues and I at Loyola university Chicago, instituted a mandatory undergradu-
ate research program for our first-year physics majors in the Spring semester of 1996.
With some evolutionary changes along the way, the Freshman Projects program will
be celebrating its 25th year this spring. In this talk, I will give a description of
types of research projects students have worked on, the effect these projects have on
the careers of these students, and how our physics program has been significantly
transformed in the process.

Asim Gangopadhyaya
