

Abstract Submitted
for the APR21 Meeting of
The American Physical Society

Commissioning the ICARUS Side Cosmic Ray Tagger¹ TYLER BOONE, Colorado State University — The installation of the ICARUS Cosmic Ray Tagger (CRT) side wall hardware is nearing completion and commissioning of the system is underway. Methods for investigating, isolating, and eliminating noise will be discussed, as well as the status of the integration of CRT readout and analysis with the light detection and charge track ionization systems.

¹This work was supported by the Office of High Energy Physics within the U.S. Department of Energy Office of Science under Award Number DE-SC0017740.
