

Abstract Submitted
for the DFD17 Meeting of
The American Physical Society

F* Yeah Fluid Dynamics: Getting started in science communication** NICOLE SHARP, FYFD — We live in an era of unprecedented opportunities for connecting with other scientists and with the public about our work, but taking the first steps into this wider world of science communication can be intimidating. This talk will focus on what researchers and students need to get started or to take their efforts to the next level. It will highlight some inspirational examples both within fluid dynamics and elsewhere, share lessons learned from fluid dynamics outreach blog FYFD, and provide current and future science communicators with valuable resources for developing their outreach.
