The American Physical Society

**Physical results from (2+1) flavor Domain Wall Fermion simulations** CHULWOO JUNG, Brookhaven National Laboratory, RBC COLLABORATION, UKQCD COLLABORATION — We present results from (2+1) flavor dynamical lattice QCD simulations, using Domain Wall Fermion and Iwasaki gauge action, in 2 different lattice spacings. We focus on continuum extrapolations of pseudoscalar meson masses and decay constants and Kaon bag parameter ( $B_K$ ).
