

Abstract Submitted
for the MAR10 Meeting of
The American Physical Society

Atonic Mechanics and Special Relativity ALFRED PHILLIPS JR,
Source Institute & Cornell Univ — The value of Atonic Mechanics is the ease of
atomic spectral calculations, as previously demonstrated for helium (see Part Two
on the web at sourceinstitute dot org). Atonic mechanics spectral calculations have
the same accuracy as those of the Schrodinger Theory but without the mathematical
tedium. We show that Atonic mechanics can be put into Special Relativity.
