

Abstract Submitted  
for the MAR10 Meeting of  
The American Physical Society

**Study of Casimir Effect in Nanosystems** SAMINA MASOOD, Univ. of Houston Clear Lake — The Casimir effect is a cause of Casimir force for nano-systems. We explicitly show that the Casimir force depends on the physical properties of nano-systems like temperature and chemical potential. The possible applications of Casimir force on nanosystem is also discussed.
