

Abstract Submitted
for the MAR11 Meeting of
The American Physical Society

Physics Education at University of Houston Clear Lake SAMINA MASOOD, Univ. of Houston Clear Lake — We are developing a physics education program to prepare teachers to teach Physics in High Schools. The science teachers training needs to be brought to the level where they can motivate children and young adults in their classrooms to take interest in science learning to adopt science and engineering career. The early selection of career path helps the better preparation for the career.
