Abstract for an Invited Paper  
for the MAR11 Meeting of  
the American Physical Society

**What happened to the US nuclear renaissance?**

ROBERT ROSNER , The University of Chicago

While nuclear power generation is seeing a distinct revival internationally, especially in Asia, a corresponding revival within the United States has not yet occurred. I will discuss the various reasons for this difference, as well as the consequences - some distinctly unintended - for the future U.S. role in the spread of nuclear power generation as well as in non-proliferation internationally.
