

Abstract Submitted  
for the MAR14 Meeting of  
The American Physical Society

**A Staged Reading of the Play: W=S:Transistor Shock** — A university is offered funding, but only if they'll name a building for William Shockley. William Shockley was an American physicist and inventor who won the Nobel Prize for his work on the transistor, but was infamous for his support of eugenics. What do they do? Join us for a dramatic staged reading of Transistor Shock, a new play by Ivan K. Schuller and Adam J. Smith, performed by the Boulder Ensemble Theatre Company. After the performance, the director, actors, and playwrights will be available for audience discussion.
