Abstract for an Invited Paper
for the MAR16 Meeting of
the American Physical Society

NIH Funding for Biomedical Imaging¹

RICHARD CONROY, National Institute of Biomedical Imaging and Bioengineering

Biomedical imaging, and in particular MRI and CT, is often identified as among the top 10 most significant advances in healthcare in the 20th century. This presentation will describe some of the recent advances in medical physics and imaging being funded by NIH in this century and current funding opportunities. The presentation will also highlight the role of multidisciplinary research in bringing concepts from the physical sciences and applying them to challenges in biological and biomedical research..
