Abstract for an Invited Paper
for the SES12 Meeting of
the American Physical Society

SUSY and the Lords of the Ring

JAMES SYLVESTER GATES, University of Maryland

The last decade in physics has led to an array of new ideas including one called supersymmetry (SUSY for short). If valid, Nature may soon begin to reveal the existence of “superpartners,” new forms of matter and energy. At the CERN laboratory in Geneva, Switzerland is a ring that will rule upon them all. It is called the LHC (Large Hadron Collider), and has recently been in the news. Come to this lecture and learn about this Fellowship of the Ring.
