

Abstract Submitted
for the TSF19 Meeting of
The American Physical Society

Working your physics muscles JAMES ESPINOSA, Weatherford College, JAMES ESPINOSA, MICHAEL ESPINOSA, None — With a growing number of students going to physical therapy instead of medical schools, I have begun re-examining my curriculum in the first semester, particularly torque. As a test of student comprehension, I gave two identical lectures with demonstrations of the bicep muscle weeks after a traditional presentation of torque. A control group of graduate students and physics faculty were also tested. An overview of the results will be shown and discussed.
