Abstract for an Invited Paper
for the TSF19 Meeting of
the American Physical Society

Recent developments in gravitational-wave astronomy

JOSEPH ROMANO, Texas Tech University

In this talk, I briefly describe recent developments in gravitational-wave astronomy, touching on searches using ground-based interferometers (e.g., LIGO, Virgo, ...), space-based interferometers (LISA), and pulsar timing arrays (e.g., NANOGrav). Where possible, I discuss synergies between the various searches.
