

Abstract Submitted  
for the TSS15 Meeting of  
The American Physical Society

**W8 - Introduction to Tablet-Based Simulations with EJSS** ANNE COX, Eckerd College — Simulations (Physlets, PhET, etc) have been widely used in instruction. However, the Java required is more difficult to use on computers and doesn't work on Tablets/Smartphones. This workshop will introduce you to Easy Java Simulations (EJSS) to write/modify simulations that will run on tablets, smartphones and computers. You need a computer with Java installed to build the simulation, but the simulation can run (without Java) in any browser or with the free EJSS Reader App.
