

Abstract Submitted  
for the MAR16 Meeting of  
The American Physical Society

**Number relativity** PHILIP SHIN<sup>1</sup>, None — Number relativity 1. Every equation of the relativity is just the way to understand through to solve one question of the math problem. We just add the hypothesis into the number. 2. Sequence of number is the machine physics for software(computer) as the number order is program equation as calculator. 3. When zero is denominator, it is not existing as it is doing something by nothing. So nothing means time as we put zero denominator into time.

<sup>1</sup>My personal physics imagine.
